The program supports.doc,.docx,.ppt,.pptx,.xls,.xlsx,.xslm,.xlsb,.html,.png,.jpg,.bmp,.gif,.tif,.csv,.rtf,.htm,.txt,.pdf, and other types of files. The program uses its own system service for storing files. Comes in handy for testing antivirus solutions and attempting to catch malware. File Creator Screenshot: File Creator is a free and open-source software utility that gives you the possibility to easily create empty files with any extension. The project was tested using.docx,.pptx,.xlsx,.doc,.ppt and.xls file types, but it works with any other kind of formats. It comes in handy for generating dummy files to test in various scenarios. For example, you can test antivirus solutions or attempt to draw out possible malware on your computer, as well as verify whether a file conversion utility or universal file opener detects a specific format, among other examples. The application is wrapped in a plain and simple interface, which consists of a standard form. It displays two buttons for indicating a destination folder, new file name and format, as well as for creating the file, respectively. As soon as the new file is created, the tool shows your new file information, namely the file name and format, date and time of creation, file size, and attributes. It doesn't display a notification messages, but you can check results by opening the output folder. Worth mentioning is that batch processing is not supported, so you can create only one file at a time. ◦Creates new empty files with a given extension and any format. ◦Supports every supported format (ppt, pptx, xls, xlsx, doc, docx, docm, docx, rtf, rtfx, rtfm, rtfm, xls, xlsx, xlsb, xlsk, xlsx, txt, txtx, txtm, txtm, pdf, pst, pstm, pstx, pstm, pstx, pdb, pdbx, pdbm, pdbm, pdbx, pdbx, csv, csvx, csvm, csvm, csvx, csvx, fts, ftsx, ftsm, ftsm, ftsx, ftsx, mdb, mdbx, mdbm, mdbm, mdbx, mdbx, vnd, vndx, vndm, vndm, vndx, vndx, fbd, fbdx, fbdm, fbdm, fbdx, fbdx, etc) Excellent. Easy to use and useful. I like the fact that it has a limit to the amount of files you can create per minute. So for example if I was to create 10 files in a minute, it will still let me create the 10th file and only the 10th file. This means that the other 9 files are saved in my list of files, which is useful if you wish to delete the files later. Once I've created the files, the only issue I have is that if I want to sort the files alphabetically or by date, it won't work. Is this fixable? I've attached a screen capture of the file I created from this utility. Here is a link to the latest version of the tool. You can create many files in one minute, but the limit is in seconds. For example if you create 1000 files in one minute it will show up as created in the list, but after 60 seconds it will be shown as "PENDING".
