What's New In LASTAR?

I don't know what happened. I just got a message that Minecraft has been updated but after I restarted my computer, the game was

already old, and when I check for updates, there's nothing new. Why is this happening?? Help please!! Minecraft has been updated to Minecraft: Java Edition 1.9.2 as of December 29, 2016. We'll be doing our best to make sure you get the latest and greatest Minecraft experience possible. One of your friends has been in contact with our support

team because Minecraft is not connecting to the internet. We're working hard to ensure that Minecraft can be connected to the internet again, but we can't make any promises. When in doubt, if you haven't done any changes to Minecraft recently, wait for the update to complete in its own time and update. Don't let this stop you

enjoying Minecraft! Q:
Minecraft won't connect to
the internet or updates
won't connect to the
internet [12/30/2016]
Update: The active team
and community are
working with Mojang to
identify the cause of this
issue. We are doing all we
can to get Minecraft back
online. This issue is
blocking more players
from being able to get the

update than any previous ones and is preventing us from completing the update and making Minecraft better. A: The best advice you can give is to let this one go, do not update anymore and please wait until Mojang finishes the work. If you have an Android device, you can download the updated version on your device. Q: What will

happen if I don't update?
[12/30/2016] Update: If you do not update, then the game will become older than it already is. This means, your save files will not be compatible with future updates. This means, if you don't update, your saves will stop working as of 1.9.2.
Q: If I don't get the update, will Minecraft crash? [12/30/2016]

Update: This is the reason this update needs to be done. Minecraft needs this update to be done to run at a good speed. Q: Why is this happening? A: There are several reasons why the update is happening. If you do not have internet connection, it can not be updated. In the meantime, we do not know the reason for the issue. Minecraft Team is

checking it out. Q: What is
Minecraft
