Some issues: I installed Tree Notebook and then realized I needed to know the password for my main account, so deleted it. I know the password and tried to install but it asks for it again. I deleted some of the accounts in the settings but it doesn't show up in the iPhone app. That is dumb, because I need to be able to use two accounts. There are two issues I found with the iOS app. I have a 4th graphics option, but it's not actually creating the graphics. The display inside the iPad app is about 60% smaller than the iPhone's. Not sure how to fix it though. + + + Related Articles: How to Backup iPhone 6 Plus to Computer 12/12/2015 - Many of us have done it by now, the backup of iPhone.
